

Uwe Friedrichsen - Lightning Talk

↳ Agile the "missing link" to managing complex systems?

Jens Schauder - How to deal with legacy code?

Sergey Shishkin - Specification by example

- Specification is the core part of software projects
  - ↳ if it goes wrong, everything goes wrong
- Specification on paper has some severe limitations
  - ↳ Scrum tried as a solution ⇒ did not work out as expected

Book: Gojko Adzic - Bridging Communication Gap

- ↳ Ideas taken from book:
- Create specification together
  - describe them by example
  - build quality in!

Book: Gojko Adzic - Specification by example

What is a software specification?

- ↳ Documentation: You must manage to get it working for you
- ↳ Validation: Not just (unit) tests, but also business rules
- ↳ Communication: Enforce comm. among team members, transform customer intent into working software

Example: Conference Registration

- Conferece Price: 1000 €

Early bird discount: 100 €

Group discount: 10%

Problem: What happens if a group registers early?

Solution: Provide an example

Attendees	Early Bird	Cost
1	N	1000
2	Y	800
3	N	2700
4	Y	3240
